

D2K Lures - Aniseed - Chocolate - Curry - Peanut

The Snap 'D2K Gels are toxin-free and can be safely applied in any environment. The flavours are highly attractive to rodents and are compatible with most rodent trapping and monitoring systems.

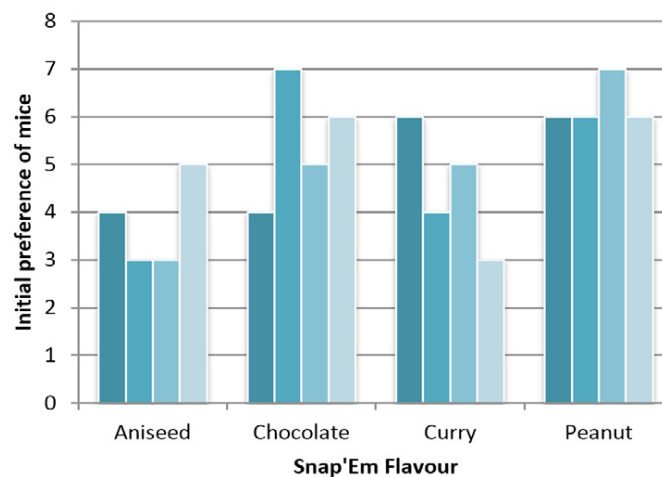

Snap 'D2K Tabs:

Snap 'D2K tabs contain a non-toxic attractant developed to fit neatly into a snap trap for a clean and simple solution to rodent trapping. The tabs remove the need for messy food lures that are prone to moulding and are difficult to clean. Due to the lure being a synthetic attractant, there is no allergen risk, making it safe to use in the food industry.

Trial Results:

The initial flavour preference of 20 mice was recorded:

- Snap 'D2K peanut was a solid favourite.
- Chocolate and Curry had a similar success rate.
- Aniseed was close behind, but tentative results are showing this is a preference of rats.

Range	Code	Product Name	Min. Order	\$	Box Order	\$
