

DESIGNED-2-KILL

NON-TOXIC NEWS

Introducing D2K managed by Alpeco Ltd which has been operating since 2002. We offer 'Alternative Pest Control' options and with the summer season up and coming we have a range of Fly traps and systems that we feel would be a great for you to stock

FLY SEASON

Hi all just a reminder fly season is catching up with us very quickly.

Get all your pre-orders in with us now and we can allocate this stock for you.

D2K – Outdoor Fly Trap Bag – Stop Before They Get In

Effective, environmentally adapted fly control solution

D2K – Non-Toxic Fly Trap Bag contains a small water-soluble special bait bag. The flies are lured by the bait, crawl into the Fly Trap Bag and cannot get out, they drown in the water enzymes solution which digests the fly, adding to the bait. This increases the capacity of the trap attracting more flies and creating a continued cycle.

- Complete with lure
- Ideal to catch house flies
- Non-Toxic
- Catches up to 10,000 flies ecologically
- Easy to use
- Compostable

Instructions for use: Simply add water and let ingredients ferment. Hang outdoor away from windows and doors. Dispose of compostable bag once full.

D2K – Window Fly Trap – Stop Buzzing Flies

Effective, environmentally adapted fly control solution

- Provides an environment free of irritating flies, non-toxic, odourless and transparent fly trap
- Long acting adhesive traps flies and other insects
- Attracts flies silently 24 hours a day and is inobtrusive
- Easy to place on window behind curtains or blinds
- Suitable for the use in caravan's, houses and offices

Instructions for use: Discreetly place on bottom of window corner with sticky surface toward inside of house. Remove narrow red strip and secure this to your window. Replace every 6-8 weeks or when trap is full.
